As Friendly as you are.

Simple and intuitive user interfaces reduce the learning curve for healthcare professionals and patients, ensuring that the technology is accessible to a wider audience.

ND-V series launches two dimensions including **10 and 12 inches**.

Accessory storage is common requirements from caregivers. ND-V series develops **practical cabinet** for storing idle accessories and provide on time support in need.

In considering the comfort of caregiver while viewing the monitor, ND-V series implement the design of tilting screen with **10 degrees**.

For cleaning and disinfection, the board of accessories cabinet is **flexible and rotatable**. While pulling it up, the board can be rotated horizontally.

Streamlined functionalities and straightforward operation contribute to faster and more efficient healthcare processes. This is particularly important in critical situations where quick responses are essential.

Accessibility in everywhere.

Simplicity in design enhances accessibility, making healthcare tools available and usable for a diverse range of scenario.

Concealed within a discreet handle and designed with a compact form factor, caregivers can effortlessly transport the monitor between units and departments for seamless mobility during transfers.

Moreover, the ND-V series facilitates mobile solutions by incorporating a trolley, allowing caregivers to move the monitor with utmost ease.

When it comes to bedside monitoring, the ND-V series can be securely mounted on the wall using a GCX arm. This not only ensures a comfortable viewing experience but also maximizes the utilization of limited bedside space.
